AUTOMATED BAG PACKAGING MACHINERY

YOUR SATISFACTION GUARANTEED

HERE'S HOW IT WORKS

LOAD A STACK OF UP TO 1,000 BAGS INTO THE BAG MAGAZINE. A SELF-GENERATING HIGH PRESSURE AIR SYSTEM DIRECTS A FINELY CONTROLLED AIR STREAM INTO THE TOP BAG: HOLDING IT OPEN AROUND A SET OF PRECISION GUIDE ARMS. AS THE PRODUCT MOVES TOWARD THE MOUTH OF THE BAG, THE GUIDE ARMS MOVE IN; CHANGING, IN EFFECT, THE FLIMSY BAG MATERIAL TO A RIGID CONTAINER FOR PURPOSES OF LOADING.

THIS MAKES FILLING QUICK AND EASY: EVEN WITH UNTRAINED HELP. OPERATOR OUTPUT IS MULTIPLIED MANY TIMES, BUT THE WORK IS MADE EASIER.
